Dear Hiring Manager at Apple,

I am thrilled to apply for the Software Engineering Intern position at Apple. As a devoted tech enthusiast and a loyal follower of Apple's innovations, I am eager to contribute to a team renowned for transforming extraordinary ideas into phenomenal products and services.

Pursuing a B.S. in Data Science and a minor in Computer Science at NYU, I've developed a solid grounding in data structures, algorithms, and programming languages like Java, JavaScript, Swift, and Python, aligning with your key qualifications. My academic and project work has consistently focused on building versatile software solutions .

As a Co-founder and Full-stack Engineer at Kaizntree Co., I've honed my skills in React and VueJS, and backend technologies like Django REST Framework and PostgreSQL. This experience has deepened my understanding of developing user-centric web applications, which I believe is crucial for Apple's web development initiatives.

During my internship at eBay Inc., I significantly contributed to modernizing their web-based dashboard using ReactJS and Django. This experience has provided me with a unique insight into improving user interfaces and backend processes, aligning perfectly with Apple's mission to enhance customer experiences through innovative software solutions.

I am particularly excited about the Backend Development, and Web Development opportunities at Apple, as they align seamlessly with my skills and interests. I am confident that my background in full-stack development and passion for creating impactful software solutions would make me a valuable addition to your team.

Thank you for considering my application. I look forward to the opportunity to discuss how my skills and experience align with Apple's innovative work and how I can contribute to your team's success.

Sincerely,

Xiaochen (Nigel) Lu
