Dear Hiring Manager,

I am writing to express my interest in the Cloud Software Intern position within the Advanced Innovation Center at Lenovo, as advertised. Currently a Master of Science in CS from NYU with a Bachelor of Science in Data Science minor in CS from NYU Shanghai, and extensive hands-on experience in software development, I am excited about the opportunity to contribute to Lenovo's mission of delivering smarter technology for all.

My educational background at NYU Shanghai, uniquely positioned at the crossroads of China and the US, has not only provided me with a strong foundation in technical disciplines but also instilled in me a deep appreciation for the cultural synergy that Lenovo embodies as a Chinese firm thriving in the global market. This experience has equipped me with the adaptability and cultural sensitivity required to navigate and excel in Sino-US team collaboration environments, aligning perfectly with Lenovo's mission in the US.

Throughout my academic and professional journey, I have amassed a wealth of experience in software development, as demonstrated in my roles at eBay Inc., where I enhanced service availability at eBay's Cloud Infrastructure team through innovative dashboards, and at Kaizntree Co., where I co-founded and led the development of a small business management platform. My technical expertise spans a wide range of technologies, including Python, JavaScript, Java, and cloud services, aligning with the qualifications sought for this role.

At Lenovo, I am particularly excited about the prospect of working with the Cloud & Software team to develop scalable solutions integrating client agents and cloud services. My prior experience in developing software solutions that leverage cloud technologies and my proactive approach to learning and applying new technologies make me a strong candidate for this role. Additionally, my background in data science and software engineering positions me well to contribute to Lenovo's innovative projects, particularly in areas that intersect with machine learning, distributed computing, and database systems.

I am keen to bring my skills in software development, my passion for technological innovation, and my unique educational background to Lenovo. I am enthusiastic about the possibility of contributing to the creation of more inclusive, trustworthy, and sustainable digital solutions that align with Lenovo's vision for a smarter tomorrow.

Thank you for considering my application. I look forward to the opportunity to further discuss how I can contribute to the success of Lenovo's Advanced Innovation Center.

Sincerely,
Xiaochen (Nigel) Lu
